

Kohinoor Gemstone — A se Z tak kya hota hai

Har step numbered · Har step mein kya ho raha hai · Sirf project ki real cheezein

POORA FLOW — HAR STEP MEIN KYA HOTA HAI

1

User browser se website kholta hai

Browser — Mobile / Desktop

USER

2

React app load hota hai — pages render hote hain

Frontend — React SPA (Vite + Tailwind)

FRONTEND

3

User gems browse / search / filter karta hai

Frontend — Home, AllGemstones, Detail

FRONTEND

4

Frontend backend ko API request bhejta hai

Backend — GET /api/gemstones

BACKEND

5

Backend request process karta hai — MongoDB se matching gems laata hai

Backend — Controllers + Gemstone model

BACKEND

6

Backend JSON response wapas bhejta hai — cards render, user cart mein daalta hai

Frontend — CartContext (localStorage)

RESPONSE

7

User Checkout par jaata hai — address select karta hai

Frontend — Checkout page (saved addresses)

FRONTEND

8

Backend Razorpay order create karta hai — payment window khulti hai

Backend + Razorpay SDK (UPI/Cards)

PAYMENT

9

Backend payment verify karta hai — Order Success page dikhta hai

Backend verify + Frontend OrderSuccess (kohinoor_orders)

BACKEND

10

User Kohinoor AI se baat karta hai — sawaal poochhta hai

Frontend — GemstoneAI chat widget

USER

11

AI context samajhta hai — MongoDB se matching gems dhundhta hai, prompt mein inject

AI — extractContext + getMatchingGemstones + buildMessages

AI

12

LLM reply generate karta hai — AI reply + gem cards chat mein dikhte hain

AI — callAIMessages (Groq→Mistral→Polli) + Frontend cards

AI

13

Admin dashboard se sab manage karta hai — gems, business, users, chats, AI settings

Admin — EJS Dashboard (/admin)

ADMIN

LLM chain: Groq (llama) → Mistral → Pollinations → hardcoded (kabhi fail nahi) · Services: Cloudinary = images · Resend = OTP/welcome email · Socket.IO = live chat

 Baaki Services — kya kya use hota hai

Service	Project mein kya karta hai
 MongoDB	Gems, Customers, Messages (chat), BusinessInfo, Categories, Settings store
 Cloudinary	Gemstone images, user avatar (face-crop), admin uploads
 Resend	Signup OTP, password reset OTP, welcome email (koi order email nahi)
 Razorpay	Checkout par order create + payment signature verify
 Socket.IO	Customer ↔ Admin live chat (typing indicator, online status)
 Kohinoor AI	Chat bot — context extract, MongoDB matching, LLM fallback chain

 Tech Stack

- React 19 + Vite + Tailwind
- Node.js + Express
- MongoDB (Mongoose)
- Socket.IO
- Kohinoor AI (LLM)
- Razorpay
- Cloudinary
- Resend
- EJS Admin
- Docker / Heroku / Vercel
